

Carbondale Recreation Center Carbondale, CO

Challenge: The fitness area was very narrow with a climbing wall in the same space. We wanted to be able to keep an open feeling in the room, as well as be mindful of the liability of having a climbing wall within reach of the strength equipment.

Solution: Adding weight stack shrouds and facing them towards the climbing wall keeps arms and hands from reaching in. With the strength and cardio equipment precisely placed, angled and not overcrowded has kept the open feeling in the room while providing a full workout.

Location: Carbondale, CO

Commercial Consultant: Laura Emrich

Equipment Overview:

- *Life Fitness Classic Cardio with 17" attachable TV's
- *Pro2 Series Strength
- *Lemond Pro Bikes

Company Bio: The Carbondale Recreation Center earned the highest honor for energy efficient design- LEED Platinum certification. This is a tremendous accomplishment, and the only recreation center in the state to achieve this. This project came under budget and ahead of schedule making it one of the leading examples that LEED certification is achievable, and with amazing success.
