**Facility Bio:** Founded in 1870 as one of the first technological schools west of the Mississippi, Missouri S&T is one of the nations top technological research universities.

Missouri S&T has 7,000 students from 47 states and 51 nations. MS&T fields 7 Men's and 6 Women's Varsity Sports Teams.

This project consisted of multiple athletic & recreational spaces. A new athletic weight room and separate cardio/core room were planned, coordinated and installed for MS&T's student athletes. A new recreation center with cardio mezzanine was also added for the student body and faculty. The recreation space provides ample room for circuit training, core training, functional training, free weight and olympic lifting, cardiovascular training and flexibility space. AEE worked closely with the MS&T planning committee to design & implement each of the new area's.
